If irrigation wells and domestic wells need to be deepened who will be responsible for the cost of deepening the wells?
Has the State Engineers office been notified that the deepening of the wells may penetrate the artesian basin?
Will the State Engineers office consent to the deepening of agricultural and domestic, and artesian wells because of loss of water due to mining?
Will the State Engineers office consent to deepening the wells in the artesian basin?
If no consent is given to deepening the wells, who is responsible for our water loss?
Who will be responsible for the economic loss to our farms if we lose our water?
What is the maximum percentage reduction in discharge of the Animas community spring attributable to the project?
What will be the maximum percentage reduction of surface flow of artesian wells?
Will you determine mitigation requirements before issuing permits?
What mitigating requirements have been considered?

LOWER LAS ANIMAS DITCH ASSOC.
